CONTENTS

JANUARY

C. Patterson and M. Tatsumoto: The significance of lead isotopes in detrital feldspar with respect to chemical differentiation within the Earth's mantle 1
Egon T. Degens and Samuel Epstein: Oxygen and carbon isotope ratios in coexisting calcites and dolomites from recent and ancient sediments 23
Egon T. Degens, Johannes H. Reuter and Kenneth N. F. Shaw: Biochemical compounds in offshore California sediments and sea waters 45
R. A. Schmitt, R. H. Smith and D. A. Olehy: Rare-earth, yttrium and scandium abundances in meteoritic and terrestrial matter—II 67
E. J. Catanzaro and J. L. Kulp: Discordant zircons from the Little Belt (Montana), Beartooth (Montana) and Santa Catalina (Arizona) mountains 87

Letter to the Editor

Vagn Buchwald: A new Cape York meteorite discovered 125

FEBRUARY

B. W. Evans: Fractionation of elements in the pelitic hornfelses of the Cashel–Lough Wheelaun intrusion, Connemara, Eire 127
J. R. Vallentyne: Biogeochemistry of organic matter—II. Thermal reaction kinetics and transformation products of amino compounds 157
Robert F. Mueller: Phase equilibria and the crystallization of chondritic meteorites . . 189
A. A. Smales, T. C. Hughes, D. Mapper, C. A. S. McInnes and R. K. Webster: The determination of rubidium and caesium in stony meteorites by neutron activation analysis and by mass spectrometry. 209
S. R. Taylor and Maureen Sachs: Geochemical evidence for the origin of australites . . 235

Geochemical Notes

R. H. Filby: The contents of several trace elements in some standard rock samples . . 265
Fredric D. Leipziger and William J. Croft: Geologic age determination by direct lead isotope analysis 268

Announcement 270

MARCH

L. H. Ahrens: Element distributions in igneous rocks—VII. A reconnaissance survey of the distribution of SiO_2 in granitic and basaltic rocks 271
Akimasa Masuda: Lead isotope composition in volcanic rocks of Japan 291
K. H. Wedepohl: Untersuchungen am Kupferschiefer in Nordwestdeutschland. Ein Beitrag zur Deutung der Genese bituminöser Sedimente 305
Royal R. Marshall and Jürg Feitknecht: Primitive lead from iron meteorites 365
Ernest E. Angino: The effects of non-hydrostatic pressures on radiation-damage thermoluminescence. 381
C. D. Curtis: Applications of the crystal-field theory to the inclusion of trace transition elements in minerals during magmatic differentiation 389

Geochemical Note

Guenther Karl Hoops: The nature of the insoluble residues remaining after the $HF–H_2SO_4$ acid decomposition (solution B) of rocks 405

APRIL

G. J. Wasserburg, T. Wen and J. Aronson: Strontium contamination in mineral analysis . 407
L. H. Ahrens: Si–Mg fractionation in chondrites 411
P. R. Whitney and P. M. Hurley: The problem of inherited radiogenic strontium in sedimentary age determinations 425
Allan Schofield and Larry Haskin: Rare-earth distribution patterns in eight terrestrial materials 437
S. R. Taylor and P. Kolbe: Geochemical standards 447
T. J. Ulrych and R. D. Russell: Gas source mass spectrometry of trace leads from Sudbury, Ontario 455
S. R. Taylor and M. Solomons: The geochemistry of Darwin Glass 471
Marianne Gillberg: Halogens and hydroxyl contents of micas and amphiboles in Swedish granite rocks 495
Masako Shima: The distribution of germanium and tin in meteorites 517
Brian Mason and H. B. Wiik: The amphoterites and meteorites of similar composition . . 533
Book Review 539

MAY

E. R. Kanasewich and W. F. Slawson: Precision intercomparisons of lead isotope ratios: Ivigtut, Greenland. 541
W. Hassenteufel und F. F. Koczy: Phosphationen-adsorption an Diatomeenoberflächen . 551
A. R. DeGrazia and Larry Haskin: On the gold contents of rocks 559
D. F. Weill and W. S. Fyfe: A discussion of the Korzhinskii and Thompson treatment of thermodynamic equilibrium in open systems 565
H. Nielsen und W. Ricke: Schwefel-Isotopenverhältnisse von Evaporiten aus Deutschland; Ein Beitrag zur Kenntnis von $\delta^{34}S$ im Meerwasser-Sulfat 577
J. P. Unik, D. J. Henderson and J. R. Huizenga: Radioactive species produced by cosmic rays in the Bogou iron meteorite 593
H. E. Suess, H. Wänke and F. Wlotzka: On the origin of gas-rich meteorites 595
Edward Olsen: Some calculations concerning the effect of nickel on the stability of cohenite in meteorites. 609
Paul B. Barton, Jr. and Priestley Toulmin, III: The electrum-tarnish method for the determination of the fugacity of sulfur in laboratory sulfide systems 619
Priestley Toulmin, III and Paul B. Barton, Jr: A thermodynamic study of pyrite and pyrrhotite 641
D. A. Spears: The radioactivity of the Mansfield Marine Band, Yorkshire 673
G. Friedrich, D. Schachner und H. Nielsen: Schwefelisotopen-Untersuchungen an Sulfiden aus den Erzvorkommen der Sierra de Cartagena in Spanien 683
Michael E. Lipschutz: Cohenite as a pressure indicator in iron meteorites? 699
G. M. Anderson: The calculated fugacity of water to 1000°C and 10,000 bars 713
Akiho Miyashiro: Oxidation and reduction in the Earth's crust with special reference to the role of graphite 717
D. Povoledo and J. R. Vallentyne: Thermal reaction kinetics of the glutamic acid–pyroglutamic acid system in water 731
Milo M. Backus, W. H. Pinson, L. F. Herzog and P. M. Hurley: Calcium isotope ratios in the Homestead and Pasamonte meteorites and a Devonian limestone 735
David E. Fisher: The aluminium content of chondritic meteorites as determined by activation analysis 743
Book Review 751

JUNE

Second International Symposium on Tektites

John A. S. Adams: Introduction 753
R. L. Fleischer and P. B. Price: Fission track evidence for the simultaneous origin of tektites and other natural glasses 755
J. F. Lovering and J. W. Morgan: Rhenium and osmium abundances in tektites 761
J. L. Setser and W. D. Ehmann: Zirconium and hafnium abundances in meteorites, tektites and terrestrial materials 769
Vladimír Bouška and Pavel Povondra: Correlation of some physical and chemical properties of moldavites 783

C. C. Schnetzler and W. H. Pinson Jr: A report on some recent major element analyses of tektites 793
R. A. Lyttleton: A cometary mechanism for the formation of tektites 807
Dean R. Chapman, Howard K. Larson and Leroy C. Scheiber: Population polygons of tektite specific gravity for various localities in Australasia 821
Dean R. Chapman: On the unity and origin of the Australasian tektites 841
Ernst W. Adams and R. Milton Huffaker: Aerodynamic analysis of the tektite problem . 881
Virgil E. Barnes: Variation of petrographic and chemical characteristics of indochinite tektites within their strewn-field 893
Elbert A. King Jr: New data on Georgia tektites 915
Vladimír Bouška: Geology and stratigraphy of moldavite occurrences 921
Rudolph Rost: Surfaces of and inclusions in moldavites 931
L. S. Walter and M. K. Carron: Vapor pressure and vapor fractionation of silicate melts of tektite composition 937
C. C. Schnetzler and W. H. Pinson Jr: Variation of strontium isotopes in tektites . . 953
E. C. T. Chao, Edward J. Dwornik and Janet Littler: New data on the nickel–iron spherules from Southeast Asian tektites and their implications 971
A. N. Thorpe and F. E. Senftle: Submicroscopic spherules and color of tektites . . . 981
George Baker: Alleged newly-fallen australite, You Yangs, Victoria 995
William A. Cassidy: Experimental testing of hypotheses for the origin of tektites . . 999
Arch M. Reid, Frederick R. Park and Alvin J. Cohen: Synthetic metallic spherules in a Philippine tektite 1009
Gerald S. Hawkins, Paul Meunier and Shoshana Rosenthal: The plume over a meteorite crater 1011
David Tilles: Stable silicon isotope ratios in tektites 1015

JULY

George Tunell: Chemical processes in the formation of mercury ores and ores of mercury and antimony 1019
Hiroshi Hamaguchi, Rokuro Kuroda, Naoki Onuma, Kazuaki Kawabuchi, Tetzuya Mitsubayashi and Kyoichi Hosohara: The geochemistry of tin 1039
Masakichi Nishimura and E. B. Sandell: Zinc in meteorites 1055
Otto Braitsch und Albert Günter Herrmann: Zur Geochemie des Broms in salinaren Sedimenten. Teil II: Die Bildungstemperaturen primärer Sylvin- und Carnallit-Gesteine . 1081
D. Lal, J. R. Arnold and B. L. K. Somayajulu: A method for the extraction of trace elements from sea water 1111
Mme. E. Jérémine, Mm. J. Orcel, A. Sandréa et J. Bahezre: La météorite de Dosso (République du Niger) 1119
C. D. Curtis: Studies on the use of boron as a paleoenvironmental indicator 1125
E. Halevy: The exchangeability of hydroxyl groups in kaolinite 1139
D. W. Thomas and M. Blumer: Porphyrin pigments of a Triassic sediment 1147
P. L. Parker: The biogeochemistry of the stable isotopes of carbon in a marine bay . . 1155
T. B. Massalski and F. R. Park: A study of four pallasites using metallographic, microhardness and microprobe techniques 1165
T. W. Bloxam: Uranium, thorium, potassium and carbon in some black shales from the South Wales coalfield 1177
Joan M. Rooke: Element distribution in some acid igneous rocks of Africa 1187
A. Hubaux and N. Smiriga-Snoeck: On the limit of sensitivity and the analytical error . 1199
Book Review 1217
Announcements 1218

AUGUST

J. N. Weber: Carbon–oxygen isotopic composition of Flagstaff carbonate rocks and its bearing on the history of Paleocene–Eocene Lake Flagstaff of central Utah 1219
D. F. Weill and W. S. Fyfe: The solubility of quartz in H_2O in the range 1000–4000 bars and 400–550°C 1243
J. N. Weber: Carbon isotope ratios in dolostones: some implications concerning the genesis of secondary and "primary" dolostones 1257
Virgil E. Barnes: Terrestrial implication of layering, bubble shape and minerals along faults in tektite origin 1267
S. R. Taylor: Abundance of chemical elements in the continental crust: a new table . . 1273

H. D. Holland, H. J. Holland and J. L. Munoz: The coprecipitation of cations with $CaCO_3$—II. The coprecipitation of Sr^{+2} with calcite between 90 and 100°C 1287
Beveridge J. Mair: Terpenoids, fatty acids and alcohols as source materials for petroleum hydrocarbons 1303
A. J. Ellis and W. A. J. Mahon: Natural hydrothermal systems and experimental hot-water/rock interactions 1323

Geochemical Note
W. Bollmann and R. E. Maringer: Cosmic irradiation damage in meteorite graphite . 1359

Book Review 1361

SEPTEMBER

A. G. Ostroff: Conversion of gypsum to anhydrite in aqueous salt solutions 1363
Virgil E. Barnes: Rayed bubbles in tektites 1373
George Baker, A. Gittins and T. H. Donnelly: Nickel-rich ataxite from Corowa, New South Wales 1377
T. J. Ulrych: The anomalous nature of Ivigtut lead 1389
H. König: Die chemische Zusammensetzung der hellen und dunklen Anteile des Meteoriten Pantar 1397
Robert F. Sippel and Everett D. Glover: The solution alteration of carbonate rocks, the effects of temperature and pressure 1401
J. M. Wampler and J. L. Kulp: An isotopic study of lead in sedimentary pyrite 1419
Ernst Bolter, Karl K. Turekian and Donald F. Schutz: The distribution of rubidium, cesium and barium in the oceans 1459
D. W. Thomas and M. Blumer: The organic chemistry of a fossil—III. The hydrocarbons and their geochemistry 1467
Karl K. Turekian: The marine geochemistry of strontium 1479
Robert A. Berner: An idealized model of dissolved sulfate distribution in recent sediments . 1497

OCTOBER

Symposium on the Degradation of Lignin in Geological Environments

Irving A. Breger: Foreword 1505
F. F. Nord: The formation of lignin and its biochemical degradation 1507
W. Flaig: Effects of micro-organisms in the transformation of lignin to humic substances . 1523
V. C. Farmer and R. I. Morrison: Lignin in sphagnum and phragmites and in peats derived from these plants 1537
N. A. Burges, H. M. Hurst and Beryl Walkden: The phenolic constituents of humic acid and their relation to the lignin of plant cover 1547
W. Ziechmann: Spectroscopic investigations of lignin, humic substances and peat 1555
P. Dubach, N. C. Mehta, T. Jakab, F. Martin and N. Roulet: Chemical investigations on soil humic substances 1567
Harry A. Tourtelot: Minor element composition and organic carbon content of marine and nonmarine shales of the Late Cretaceous age in the western interior of the United States . 1579
A. Szalay: Cation exchange properties of humic acids and their importance in the geochemical enrichment of UO_2^{++} and other cations 1605
Cornelius Steelink: Free radical studies of lignin, lignin degradation products and soil humic acids 1615
H. Jaschhof: Preliminary studies of the decomposition of lignin by bacteria isolated from lignite 1623

NOVEMBER

D. Krankowsky und O. Müller: Isotopenhäufigkeit und Konzentration des Lithiums in Steinmeteoriten 1625
W. G. Ernst: Petrochemical study of coexisting minerals from low-grade schists, Eastern Shikoku, Japan 1631
R. S. Bradley, A. K. Jamil and D. C. Munro: The electrical conductivity of olivine at high temperatures and pressures 1669
D. A. Spears: The major element geochemistry of the Mansfield Marine Band in the Westphalian of Yorkshire 1679

H. König: Über die chemische Analyse von Chrondriten 1697
R. L. Fleischer and P. B. Price: Techniques for geological dating of minerals by chemical etching of fission fragment tracks 1705
A. J. Erlank and J. P. Willis: The zirconium content of chondrites and the zirconium–hafnium dilemma 1715
George W. Reed Jr: Fluorine in stone meteorites 1729
J. F. Lovering: Electron microprobe analysis of terrestrial and meteoritic cohenite . . 1745
M. L. Keith, G. M. Anderson and R. Eichler: Carbon and oxygen isotopic composition of mollusk shells from marine and fresh-water environments 1757
M. L. Keith and J. N. Weber: Carbon and oxygen isotopic composition of selected limestones and fossils 1787
J. N. Weber: Trace element composition of dolostones and dolomites and its bearing on the dolomite problem 1817

Geochemical Notes

L. H. Ahrens: Notes of Na–K fractionation in chondrites 1869
Leon E. Long: Preliminary Rb–Sr investigation of Tertiary granite and granophyre from Skye 1870
Von E. Merz und E. Schrage: Aktivierungsanalytische Bestimmung des Zr–Hf-Verhältnisses in Steinmeteoriten und Gesteinen 1873

Book Review 1879

DECEMBER

Ahmed El Goresy: Die Erzmineralien in den Ries- und Bosumtwi-Krater-Gläsern und ihre genetische Deutung 1881
Nobuyuki Nakai and M. L. Jensen: The kinetic isotope effect in the bacterial reduction and oxidation of sulfur 1893
E. L. Sprenkel-Segel and S. S. Hanna: Mössbauer analysis of iron in stone meteorites . 1913
F. Rost und W. Grigel: Über accessorische Elemente in mitteleuropäischen Eklogiten und ihren Mineralien 1933
A. Minton and E. Rosenberg: The effect of temperature on the preservation of purine and pyrimidine bases 1953
R. A. Schmitt, E. Bingham and A. A. Chodos: Zirconium abundances in meteorites and implications to nucleosynthesis 1961
P. Bowden: Gallium in Younger Granites of Northern Nigeria 1981
S. R. Taylor: Trace element abundances and the chondritic Earth model 1989
O. K. Manuel and M. W. Rowe: Noble gases in the Bruderheim chondrite 1999
John J. W. Rogers and Keith A. Richardson: Thorium and uranium contents of some sandstones 2005
J. R. Butler: Concentration trends and frequency distribution patterns for elements in igneous rock types 2013
